SUMMARY

Passionate and result driven software developer with 1 and a half years experience developing Android applications and 6 months experience developing iOS & Android applications using Flutter, Google's mobile UI framework for crafting high-quality, native-like applications. I am currently enrolled at the University of South Africa studying Computer Science. I also enrolled in several courses in Udemy to up-skill myself. Current courses are Discrete Mathematics, Flutter & Dart as well as Computer Science and Programming fundamentals.

WORK EXPERIENCE

January 2019 - Present

Intermediate Android Developer, Applord PTY(LTD)**Responsibilities:**

- Integrate the Masterpass SDK as well as implementing APIs from Beyond Payments into the Standard Bank Sorted application in the MiMoney section
- Refactor the Standard Bank Sorted MiMoney section to be in line with the rest of the app's architecture and new business as well as functional requirements
- Change the UI to be in line with the new requirements from Standard Bank

January 2018 – December 2018

Intern – Android Developer, Applord PTY(LTD)**Responsibilities:**

- Maintain and improve code quality
- Create small in-house applications for the company
- Quickly create robust demonstration applications for clients
- Up skill myself to work on the Standard Bank Sorted Application
